

Morgan Adams

Tempe, AZ 85283

PROFESSIONAL SUMMARY

Full-stack developer with a MERN certification and extensive experience building web applications from concept to completion. Specializing in React and RTK with database and Node knowledge. Passionate about solving complex problems, learning new technologies, and helping others succeed. Experienced in developing full-stack applications, working with Git-based team workflows, mentoring peers, and exploring AI-assisted programming. Seeking a Junior Software Engineer position.

TECHNICAL SKILLS

Frontend: React, JavaScript, Redux Toolkit, Vite, Tailwind CSS, DaisyUI, Bootstrap, Motion

Backend: Node.js, Express, MongoDB, Mongoose, JWT, Passport.js, Socket.io, REST APIs

AI & Tools: Ollama, Hugging Face, Git, GitLab, Agile, Scrum, Pair Programming, Team Collaboration

SOFTWARE DEVELOPMENT EXPERIENCE

PersevereNow | Software Developer

December 2024 – July 2026

Collaborate within Agile development teams to design and deliver full-stack web applications using the MERN stack.

CRM Donor Management Application

- Developed donor prospect tracking functionality to identify individuals who registered as donors but had not previously contributed.
- Built paginated and sortable React/Tailwind tables using Redux Toolkit for state management.
- Created and maintained Mongoose schemas and MongoDB integrations.
- Implemented full CRUD functionality across application features.

Donation Management Features

- Built and implemented donation update functionality with React, Redux Toolkit, and MongoDB.
- Developed archive workflows that preserved historical data while preventing accidental modification.
- Utilized state management and database synchronization to ensure data integrity.

Additional Projects

- Implemented role-based permissions and task management functionality for a project tracking application.

- Developed authentication systems using Redux Toolkit and JWT-based security practices.
 - Built a GUI for Ollama with multiple chats functionality and favorite answers or chats page.
 - E-commerce site for shopping with full payment capabilities.
 - Holistic Health and Wellness application using Cursor and GitHub copilot as my assistant
 - Currently working on a service-based website for a client.
 - Plus 50 + more applications.
-

LEADERSHIP & COMMUNITY EXPERIENCE

Peer Facilitator | Persevere Coding Program

- Mentored students learning software development concepts and debugging techniques.
 - Assisted peers with project development.
 - Strengthened communication, leadership, and technical coaching skills.
 - Frequently arrived early and dedicated additional hours to support student success and personal growth.
-

EDUCATION

Persevere Bootcamp

MERN Full Stack Certification
2023 – 2024

CONTINUING EDUCATION & CERTIFICATIONS

Google: Password Security, Progress Bar Development, Chatbot Development

LinkedIn Learning: JavaScript as a Second Language, Introduction to Artificial Intelligence, MERN Essential Training

Additional Coursework: 13 certifications in software development, web technologies, and professional growth.

HIGHLIGHTS

- Approximately 6,500+ hours of coding, debugging, mentoring, and application development.
- Experience working independently and in self-directed learning environments.
- Strong problem-solving and analytical thinking skills.
- Proven ability to learn complex technical concepts quickly.
- Effective communicator with experience mentoring peers and collaborating across teams.
- Currently working with and interested in learning more about AI-assisted software development and emerging technologies.
