SUMMARY

A self-motivated junior web developer with nearly three years of hands-on coding experience in a structured boot-camp environment. Passionate about building clean, responsive applications and mentoring peers to reach their potential. Experienced in full-stack MERN development.

TECHNICAL SKILLS

Frontend	Backend	Databases	Dev Tools	Methodologies
React, RTK, Vite, TailwindCSS, DaisyUI, Bootstrap	Node.js, Express, Socket.io, Passport, JWT, Argon2	MongoDB, Postgres	Git, GitLab, GitLab Issues, VS Code	Agile, Scrum

Additional: HuggingFace, Ollama (AI chat), FakerJS, React-bits, Motion, Three.js

PROFESSIONAL EXPERIENCE

Persevere BootCamp - Chandler, AZ

Teaching Assistant / Junior Web Developer | Oct 2023 - Present

- Led weekly “office hours” sessions for 20+ students, breaking down complex concepts to help them complete a year long bootcamp and earn their MERN certification.
- Co-authored a comprehensive class wiki (Docusaurus) that serves as the go-to resource for all students; the wiki now contains a multi-section guide that maps weekly curriculum, resources, and best-practice code snippets.
- Team Lead for the first on-site hack-a-thon, directing a 4 person team that built a full-stack Daily Check In and Out Count App; the app won the “Best Innovation” award.
- Worked in a team a CRM system for donor tracking for a non-profit featuring CRUD, secure authentication, pagination, sortable tables enabling staff to quickly identify prospects and donors. Developed update and archive forms with server side validation.

- Designed and implemented a real-time chat application (Socket.io + Ollama) featuring CRUD operations, multiple chat rooms and realtime AI.
- Developed a project tracker with dynamic role rendering (Admin, Employee) with full CRUD using Redux Toolkit and styled with Tailwind and DaisyUI.
- Authored a reusable, Argon2-protected login system integrated with JWT authentication and Redux Toolkit.

EDUCATION & CERTIFICATIONS

Program	Year	Focus
Persevere BootCamp – MERN Full Stack Certification	2024	Full-stack development, project-based learning
Google – Password Security & Advanced JavaScript	2024-2025	Auth best practices, interactive coding
LinkedIn Learning – JavaScript, MERN Essentials, Intro to AI	2023-2025	Core web technologies, machine-learning fundamentals

What I Bring

- **Mentorship & Team Leadership:** Guided peers alongside a Senior Developer through a year of full time schooling to become MERN developers. Lead a team of four from concept to delivery during a 12 hour hack-a-thon.
- **Problem-solving:** Turning ambiguous requirements into clean, maintainable code. Trouble shooting students code to fix errors, then explaining in human words what was wrong and how I corrected it.
- **Communication:** Translate technical ideas into clear, actionable steps for non-technical people. Easy to talk to and collaborate with.
